

AIRCELL FAX 'N' GO

Take advantage of global fax service with AirCell's Fax 'n' Go solution.

Satcom Fax Solution

Now, there's an affordable way to send and receive airborne faxes with your AirCell Iridium phone system: the AirCell Fax 'n' Go service.

Using technology developed by On-Go, the leading provider of airborne fax solutions, Fax 'n' Go enables your AirCell Satcom to process fax signals. Using an onboard Universal Communications Hub (uniHub), you can communicate with virtually any standard Group 3 fax machine in the world — as easily as using the fax machine in your office!

The Benefits of Airborne Faxing

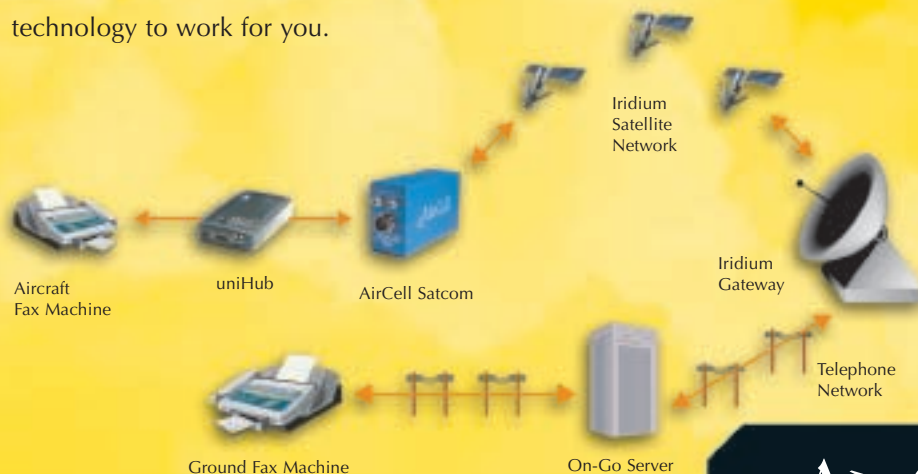

- o Send and receive faxes from your AirCell Satcom transceiver system
- o Standard Group 3 fax compatibility
- o Convenient faxing anywhere in the world
- o Inexpensive to buy, inexpensive to use
- o Compact and easy-to-use
- o Makes faxing from your aircraft as simple as faxing from your office on the ground
- o Works with any AirCell Satcom system

AirCell Fax 'n' Go: How It Works

Eliminating the problems associated with converting digital fax to analog phone signals, AirCell's Fax 'n' Go is both easy to use and easy to install.

To initiate a fax, dial the number of the destination fax machine on the Fax 'n' Go keypad and press Start. The Fax 'n' Go uniHub "packetizes" the information and sends it to the ground, where it's forwarded over the terrestrial phone network to its destination. The process works in reverse to receive a fax, as shown in the diagram below.

The result? Easy-to-use airborne faxing — and another example of how AirCell puts technology to work for you.

AirCell[®]

Specifications

Dimensions

uniHub	3.50" H x 5.50" W x 1.25" D (8.9 cm x 14.0 cm x 3.2 cm)
--------	--

Weight

Without Battery	.4 lbs. (.23 kg)
-----------------	------------------

Power Requirements

DC Adaptor, Switching Power Supply	Input 105-220 VAC Output 12 VDC <i>(5.5 mm OD, 2.1 mm ID, DC Tip)</i>
------------------------------------	---

System Connectors

Connector to Fax RJ-11	Telephone Cord
Connector to Phone RS-232	Computer Serial Cable

Environmental Conditions

Storage	-50°C to 80°C
Humidity	+40°C, 95%

Features

Processor	66 MHZ ARM7 CPU
Programmable Storage	8 MB Flash
Storage	16 MB SDRAM
Display	6 LEDs
User Input	Through Fax Machine

Notes: To take advantage of this faxing capability, you need the uniHub and the monthly service, both of which are available through AirCell. Airtime and service charges will appear on your normal monthly statement.
